

FIG. 3

This technical drawing shows a cross-section of a multi-layered assembly. The assembly consists of several horizontal layers separated by vertical dividers. The layers are labeled with numbers and arrows indicating their positions and features:

- Top Layer:** Labeled with 94 and 78. It has a top surface with a series of semi-circular protrusions.
- Second Layer:** Labeled with 82 and 96. It is a thin layer with a dashed line indicating a boundary.
- Third Layer:** Labeled with 74 and 94. It has a bottom surface with a series of semi-circular protrusions.
- Fourth Layer:** Labeled with 82 and 96. It is another thin layer with a dashed line.
- Fifth Layer:** Labeled with 74 and 94. It has a bottom surface with a series of semi-circular protrusions.
- Sixth Layer:** Labeled with 82 and 96. It is another thin layer with a dashed line.
- Seventh Layer:** Labeled with 74 and 94. It has a bottom surface with a series of semi-circular protrusions.
- Eighth Layer:** Labeled with 82 and 96. It is another thin layer with a dashed line.
- Ninth Layer:** Labeled with 74 and 94. It has a bottom surface with a series of semi-circular protrusions.
- Tenth Layer:** Labeled with 82 and 96. It is another thin layer with a dashed line.
- Eleventh Layer:** Labeled with 74 and 94. It has a bottom surface with a series of semi-circular protrusions.
- Twelfth Layer:** Labeled with 82 and 96. It is another thin layer with a dashed line.
- Thirteenth Layer:** Labeled with 74 and 94. It has a bottom surface with a series of semi-circular protrusions.
- Fourteenth Layer:** Labeled with 82 and 96. It is another thin layer with a dashed line.
- Fifteenth Layer:** Labeled with 74 and 94. It has a bottom surface with a series of semi-circular protrusions.
- Sixteenth Layer:** Labeled with 82 and 96. It is another thin layer with a dashed line.
- Seventeenth Layer:** Labeled with 74 and 94. It has a bottom surface with a series of semi-circular protrusions.
- Eighteenth Layer:** Labeled with 82 and 96. It is another thin layer with a dashed line.
- Nineteenth Layer:** Labeled with 74 and 94. It has a bottom surface with a series of semi-circular protrusions.
- Twentieth Layer:** Labeled with 82 and 96. It is another thin layer with a dashed line.
- Bottom Layer:** Labeled with 74 and 94. It has a bottom surface with a series of semi-circular protrusions.

Additional labels and arrows include:

- 90:** Points to the bottom surface of the assembly.
- 88:** Points to the bottom surface of the assembly.
- 86:** Points to the bottom surface of the assembly.
- 60:** Points to the bottom surface of the assembly.
- 70:** Points to the bottom surface of the assembly.
- 72:** Points to the bottom surface of the assembly.
- 74:** Points to the bottom surface of the assembly.
- 82:** Points to the bottom surface of the assembly.
- 96:** Points to the bottom surface of the assembly.
